

Today's most advanced filtration system.

Blue Moon® is a unique multi-stage filter system that extracts 90-97% of impurities from LPG. This innovative filter eliminates heavies and particulates (sulfur, metal flake, etc.) protecting fuel injectors and precision components more completely than any other product available in the industry today. Over the long term, this saves on replacement parts and repairs.

Blue Moon®

Blue Moon Filters

Part Number	Description	Flow Rate GPM	Replacement Cartridge
FST-26	3/8" FPT Disposable filter for LP	15	N/A
