

# Excess Flow Valves-Marshall Excelsior

Marshall Excelsior Excess Flow Valves are intended for use in liquid or vapor LP Gas or NH<sub>3</sub> systems. Excess flow valves can be used for filling, withdrawal, and vapor equalization in containers or line applications, specifically long lines or branch piping. This product protects against excessive discharge as a result of a break in the hose or piping system. The excess flow feature is designed to remain closed after activation until the system pressure equalizes on both sides of the shutoff poppet.

### Features:

- All Models Feature Stainless Steel Stem, Spring, and Valve Guide
- Valve Body and Shutoff Poppet Available In Brass, Zinc Plated Steel, or Stainless Steel
- Available From 3/4" NPT Through 3" NPT (Male x Female & Male x Male)
- Zinc Plated Steel and Stainless Steel Models can be Used with LP Gas or NH<sub>3</sub>
- Break Away Feature Leaves Valve Assembly Intact with Internal Hex Broach for Easy Removal
- Available in a Wide Variety of Closing Flow Rates.
